# Azure Data & AI Training

Artificial intelligence and data science are two of the most exciting and promising areas of technology today. Through Microsoft AI training at Fast Lane you can learn how to use Cognitive Services, Machine Learning, and Knowledge Mining to architect and implement Microsoft AI solutions – AI which includes natural language processing, speech, computer vision, bots, and agents. If data is more your thing, we have training solutions for data engineering to understand how to design and implement the management, monitoring, security, and privacy of data, as well as training for data scientists to master the application of Azure's machine learning techniques to train, evaluate, and deploy models that solve business problems.
